

October 10, 2016

Good Afternoon

This is Kevin Joyce, President, LSIA. The board received an email from Joe Shafer this morning requesting some information. I called him this morning and we had a lengthy discussion. I did my best to answer his questions regarding LSIA without going into any detail about Board business that has still not been discussed or approved yet.

After talking with him, he told me that he was very satisfied with the answers he received and is in agreement with me with moving forward to make this community a better place for people to own and live here.

He states he and has always been for the better of the community and is not against a legal and legitimate association. He believes that it is very important that the entire board acts in the best interest of the community and that is all he ever wanted to accomplish with the signs. He stated to me that he has removed the sign off of his house and never meant any harm to the community by posting it. He was just looking for answers that he never received from previous boards.

Joe has reviewed this letter and gave his permission for me to post this through the community email since he had no ill intentions towards anyone specific. He, like everybody else just wants Lancelot Shores to be a legal and legitimate association.

Going forward to try and prevent any further rumors or misled information, please voice your concerns or questions to info@lancelotshores.com. We will do our best to try and address everything to the best of our ability with legal and correct answers.

Let's get our community great again by working together as we should instead of against each other.

Thank you everyone!
Kevin
